About Me

As a highly motivated and skilled web developer with over six years of experience building and maintaining dynamic and interactive websites, I am confident in my ability to deliver exceptional results." My expertise in PHP, JavaScript, and AI & Automation, combined with my experience using various frameworks such as WordPress, and Shopify, has allowed me to create user-friendly and responsive web applications that meet clients' unique needs. My passion for problem-solving has been demonstrated through the successful delivery of several complex web development projects, including a custom e-commerce platform for a small business. I am excited to continue growing my skills and making a positive impact through my work as a web developer.

Other Work

I volunteered at the Bangladesh Red Crescent Society from January to April 2021. During my time there, I worked in the Disaster Response Team, providing relief and assistance to victims of the recent floods in Bangladesh. My duties included: Distributing food, water, and other essential supplies to affected families Providing medical care to injured and sick people

Assisting with the cleanup and rebuilding efforts I also took part in several training sessions on disaster preparedness and response. These sessions helped me to learn about the different types of disasters that can occur in Bangladesh, as well as the best practices for responding to them. I am grateful for the opportunity to have volunteered at the Bangladesh Red Crescent Society. It was a rewarding experience that taught me a great deal about humanitarian work and the importance of helping others. I am confident that the skills and knowledge that I gained during my time there will be valuable in my future career.
